

PROJECT EXHIBITION

“School is the temple of learning”. So, we also decided to teach our students something innovation through which they can develop their thinking power, cooperation values , team spirit etc. Because of so many advantages of projects, we celebrated project exhibition on 15th November 2013.

We invited the heads of the school Management for the inauguration of the exhibition. Our students made a variety of projects related to English and Hindi Language, Maths, Science, Social studies, Craft and many other subjects . we made ghost house also.

In our school all classes , our students exhibited all the glamorous and wonderful models very nicely. Their explanation was also very beautiful. All this was under the guidance of our headmistress and teachers. Parents and guests came to see the exhibition. They praised the Students and Encouraged them in making such dynamic projects.

Through this project exhibition students learned so much and they worked hard to achieve their aims. And with the lot of appreciation from parents and guests they were even more encouraged.

That’s why it is said that “Those who want to succeed will find a way, those who don’t will find an excuse”.

Our students also find their way and they achieved their success.
